

IOTΞXPAD

ABSTRACT

lotexpad is the first launchpad to be built, launched, and powered by IoTeX. lotexpad becomes the primary incubator for and native launchpad for all the leading IoTeX projects. Taking the right projects to the crypto enthusiastic community has always been a tedious task, and lotexpad gives projects IoTeX the power to distribute tokens easily and raise funds. lotexpad community members enjoy access to top-tier projects on the IoTeX network, minimizing the chance of loss of funds.

lotexpad is a 100% decentralized launchpad dedicated to project launches on IoTeX.

What Is Iotex?

IoTeX is a dedicated private 'blockchain-within-a-blockchain' solution to support the Internet of Things (IoT). It is a robust design that connects internet devices across the world block by block. In spite of PoS or PoW, this blockchain solution uses Roll-DPoS (Proof of Stake, combined with the use of sidechains) consensus mechanism to enhance the speed and scalability. IoTeX also uses a lightweight technique for preserving privacy. IoTeX has a built-in privacy feature that uses a ring signature that preserves transactions. By 2022, there will be more than 50 billion IoT devices, according to the research by Juniper. To manage such a huge number of devices and to provide secure methods of communication among devices, IoTeX's role is inevitable.

What Is lotexpad?

lotexpad is the first decentralized IDO platform for projects launched on the IoTeX blockchain network. It empowers the projects to raise liquidity seamlessly and take their tokens to the right audience worldwide. The TEX token holders will be incentivized with access to game-changing tokens that are launched in the IoTeX network. lotexpad has a low barrier to entry and anyone can get started relentlessly. lotexpad is an exclusive token launch platform for transformative IoTeX projects that takes crowdfunding to a whole new level with safe and easy use of crypto assets to benefit the projects and their investors.

Opportunity

IoTeX projects eliminate most of the drawbacks that are prevailing in the Ethereum blockchain, especially the escalated gas fee. Ethereum blockchain is the root cause for tremendous growth in DeFi, and so there are a lot of projects being deployed on it. This increases the utility of Ether (ETH), which leads to an increased gas fee. IoTeX, on the other hand, has several advantages over other blockchains.

Advantages Over Other Blockchains

IoTeX uses the DPoS consensus mechanism, i.e. PoS with the benefits of sidechains to make the projects more scalable.

HIGHLY SCALABLE

Unlike other blockchains, IoTeX uses ring structures to sign transactions which is an in-built privacy feature of the network.

IMPROVED USER PRIVACY

While a small transaction in Ethereum blockchain can cost a gas fee of a few hundred dollars, IoTeX allows transactions that are relatively cheaper.

LOW OPERATING COSTS

A Fair Launching Platform

The flaw of conventional IDO launchpads is that they distribute tokens on a first come first serve basis, which is more of a kind of gamble where the native holders may or may not get access to the launched tokens. To get rid of this uncertainty, lotexpad establishes itself as a community-driven and fair launch platform that guarantees allocation for the existing token holders based on a four-tier system. lotexpad does not allow bots to fill in the whitelist spots that occur in most of the launchpads.

IDO

The Game Changer

Before Launchpad, blockchain projects staged their own Initial Coin Offerings (ICOs) to raise crypto funds for their own growth and development. Results have varied under this old approach, with each success story being matched by cautionary tales of failures and frauds, and crypto users lack necessary protections and were left on their own. The introduction of IDOs on lotexpad spurred a new paradigm under which projects can raise funds and users can support these projects in a more convenient and safer way.

Why lotexpad?

Easy Fundraising

lotexpad provides a way through which new IoTEx projects can raise capital from a platform that is already used by most of the crypto world.

Wider Audience

As the renowned launchpad, lotexpad already has access to crypto enthusiasts and investors, who are likely to be interested in gaining early access to high-quality token sales.

Why lotexpad?

Safe For Investors

Investors need not go in search of game-changing projects as lotexpad takes every rug-free and trusted project to its community members. Investors can use their crypto assets to access these tokens without risking their funds.

More Focus On Development

The IoTEx projects need not create their own fundraising platform. While lotexpad takes care of the token sales with top-notch security, projects can focus more on developing their core idea.

How Does lotexpad Work?

lotexpad wants to keep things straight, transparent, and genuine. So, it offers a tiered operating mechanism that offers a guaranteed allocation. NO BOTS, NO SCAMS is what lotexpad is made for. There are four tiers namely Bronze, Silver, Gold, and Elite. The threshold holding requirement for each tier varies and does the allocations.

“ NO BOTS, NO SCAMS ”

Iotexpad Token Metrics

| | | |
|-------------------------------------|---------------------------------------|---|
| IOTXPAD TOKEN NAME | TEX TOKEN SYMBOL | 100,000,000 TOTAL SUPPLY |
| \$420,000 SEED ROUND | \$1,360,000 PRIVATE ROUND | \$200,000 PUBLIC ROUND |
| \$1,980,000 TOTAL HARDCAP | \$270,000 INITIAL MARKETCAP | 2.7% INITIAL CIRCULATING SUPPLY |

Token Distribution

| Allocation | Percentage | Vesting | Price |
|----------------------|------------|--|----------|
| Seed | 6.00% | 10% at TGE and 10% at week2 followed by 20% each month | \$0.0700 |
| Strategic Round | 16.00% | 10% at TGE and 10% at week2 followed by 20% each month | \$0.0850 |
| Public Sale | 2.00% | 25% at TGE then 25% at week2 followed by cliff at 25% each month | \$0.01 |
| Staking | 15.00% | - | - |
| Marketing & Partners | 20.00% | 10% before listing then 10% quarterly | - |
| Reserve | 10.00% | Locked for 1 year | - |
| Liquidity & Pools | 6.00% | - | - |
| Team | 20.00% | 6 Months lock then 10% quarterly | - |
| Advisors | 5.00% | 6 Month lock, then 20% quarterly | - |
